Frontend Developer with 6+ years of experience building scalable, high-performance web applications using React and TypeScript. Specialized in micro-frontend architecture, dynamic form engines, and complex multi-step workflows for enterprise applications. Strong expertise in state management and API integration using RTK Query, with a focus on performance optimization and user experience. Proven track record of delivering production-ready features, maintaining system stability, and collaborating effectively within Agile teams.

Technical Skills

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, Redux Toolkit, RTK Query, React Router, React Hooks.

Backend: Node.js, Express.js, REST API Development

Architecture & Concepts: Micro-frontend Architecture, Component-Based Architecture, State Management, API Integration, Dynamic Forms, Multi-step Workflows

Styling & UI: Tailwind CSS, Material UI, HTML5, CSS3, Responsive Design

Tools & Workflow: Git (branching, pull requests, code reviews), Agile/Scrum, Jira, Deployment & Release Processes

Testing & Debugging: Manual Testing, Bug Fixing, API Error Handling, Performance Optimization

Databases (Basic): MySQL, PostgreSQL

EXPERIENCE

Fullstack Developer at Tentacle| Etiqa Insurance & Takaful, Kuala Lumpur, Malaysia(fulltime) FEB 2025–FEB 2026

- Developed scalable micro-frontend modules for a Commercial Vehicle Insurance platform using React, TypeScript, and Vite, enabling independent deployment and improved scalability
- Built reusable and maintainable UI components using modern React patterns (hooks, state management), improving consistency and reducing code duplication
- Designed and implemented a dynamic form engine to support configurable and reusable business forms
- Developed complex multi-step workflows with validation, state persistence, and enhanced user experience
- Integrated backend services using RTK Query, handling API communication, caching, loading states, and error handling
- Managed user input validation (e.g., authentication forms) and improved reliability of data submission processes
- Implemented localStorage strategies to persist user progress across sessions
- Followed structured Git workflows including branching, pull requests, code reviews, and merging into main branch
- Participated in build, testing, and release processes, ensuring production readiness
- Contributed to deployment activities and supported production environments by diagnosing and fixing issues
- Performed post-deployment and post-merge testing to identify frontend and backend issues
- Fixed frontend bugs and collaborated with backend teams to resolve API-related problems
- Worked in Agile/Scrum environment using Jira, collaborating with cross-functional teams to deliver features on time
- Collaborated with DevOps using GitHub Actions CI/CD pipelines, triggering deployments through Git tagging and supporting automated build and release workflows

Technologies: React.js, JavaScript, TypeScript, micro frontend, Redux toolkit, React Router, Tailwind, Node.js and GitHub Actions (CI/CD).

Mid-level Frontend developer at Freelancer, Kuala Lumpur, Malaysia(freelancer) OCT 2022 – OCT2024

- Developed front-end for online shopping platform using React.js and Redux for state management, implementing product listing, cart functionality, and efficient global state handling
- Developed front-end for online car rental web application, building responsive UI for booking flow, vehicle selection, and user interactions
- Developed front-end for pet owners' management application, creating user-friendly interfaces for managing pet data, records, and related workflows

Technologies: React.js, JavaScript, TypeScript, Redux.js, React Query, React Router, React Hook, React Pattern, Bootstrap, HTML, CSS, and git.

Mid-Level React developer at PND, Texas, USA (Remote) OCT 2021 – OCT 2022

- Create report forms to upgrade the system from JSP to React. Develop front-end for wallet application using React.js and redux.
- maintain front-end application and add features to the health-care web app.

Technologies: React.js, JavaScript, TypeScript, Redux.js, React Query, React Router, React Hook, React Pattern, Bootstrap, HTML, CSS, and git.

Junior React Frontend developer at Hamrasta, Tehran, Iran (fulltime) APR 2019 – OCT 2021

- Creating React forms for government service payment for 12 services and bills.
- Using Redux.js for status management of 12 service forms.
- manage online payment forms for sharing payments between 4 departments. Use Redux.js for state management.
- Shared knowledge and experiences of implementing different tools and discussed the pros and cons of each one in different businesses on Wednesday's meeting.

Technologies: React.js, JavaScript, TypeScript, Redux.js, React Query, React Router, React Hook, React Pattern, Bootstrap, HTML, CSS, and git.

Junior Full stack developer at Baharan, Tehran, Iran (full-time) APR 2018 – APR 2019

- Implement Services with Restful, Fetch data from Oracle & PostgreSQL databases using hibernate, JPA, and HQL.
- Design UI and Create forms for the online exam with a team of 10 people for 500,000 employees.
- Implementation of consolidated reports of immovable property of organizations in Jasper Report for more than 500K records.
- Rewriting queries to optimize the response time up to 2x.

Technologies: *Java, Spring framework, Hibernate, JPA, PostgreSQL, Jasper Report, Angular, Typescript, HTML, CSS, Bootstrap, Git, Jira.*

EDUCATION

Bachelor in Computer Software Engineering, Islamic Azad University of Lahijan branch, Lahijan, Guilan 2009 – 2013

LICENCE AND CERTIFICATION

- The Ultimate React Course 2023: React, Redux & More, Udemy, SEP 2023.
- HTML, CSS, & JavaScript - Certification Course for Beginners, Udemy, SEP 2023.
- JavaScript Course 2023-from Zero to Expert, Udemy, NOV 2023.
